

CANOPY OR BOX FLY SCREEN

A four sided fly screen box screwed together to form a rigid structure. The fly screen box is then fitted over opening part of the window with clips so as it can easily be removed.

How they work	The rear frame of the screen is secured to the existing window frame or any flat surface. Once secured, the window will open into the box allowing ventilation, yet keeping insects out.
Suitability	This type of box is ideal for mounting over louvres or horizontal and vertical centre pivot windows.
Maintenance	Mesh can be cleaned with hot soapy water.
Technical	Screen is available in white or brown aluminium with fibre or stainless steel mesh.
Guarantee	12 months on all workmanship under normal wear and tear.
